## Project Title: Woody Allen

I'd like to build this site as multiple page, rather than a long, single page website. The site navigation will appear on the top. I think there is plenty of content and photography to build out individual pages. I want the style of the webpage to fit the styles of Allen's films. Design should be simple and clean and easy to use for the users.

- **Home Page/Introduction** – Basic introduction of Woody Allen. Set the tone for his style of cinema and iconic features of his films
- **Early Life**
- **Career**
- **Personal Life**
- **Theater & Music**
- **Filmography and awards**
- **Reference** – this page will list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
